

Kit number 20

Air America® 6 Pack Seat Kit

Package Contents:

6 Regulator Seat

Tools required to complete installation:

Replacement Procedure:

WARNING: Always remove all the air from the system prior to attempting any repairs. To achieve maximum benefit from your factory replacement parts, have them installed by an authorized AIR AMERICA® technician. Additional technical assistance is available at www.airamerica.com.

The regulator seats enclosed in this kit are used in a variety of Air America systems. Please locate the system(s) that you wish to repair in the list of service kits offered and utilize the instructions for that particular regulator.

Reminders:

- Air America regulator seats are tapered and should be installed accordingly.
- You should NEVER replace an Air America regulator seat with any other type of seat. Doing so may cause damage to other components in your system.

Air America's seats are pressure tested. Our seats are specifically engineered for the applications in which they will be used.

Reminder: If you are unsure or do not feel comfortable with doing the repair after following the supplied instructions, remember you can send your system in to the factory for it to be professionally serviced.
